

PAYAPP DIGITAL, UAB COOKIES POLICY

This Cookies Policy (hereinafter – the **Cookies Policy**) provides you with the basic information on how **PAYAPP DIGITAL, UAB**, legal entity code 305397637, registered address at Upės St. 23, Vilnius, the Republic of Lithuania, (hereinafter – **us**, PAYAPP or the **Company**) uses cookies in the website www.payapp.com (hereinafter – the **Website**) and the role they have in assisting us to provide better, faster and safer user experience on the Websites.

Please note that this Cookies Policy is a part of PAYAPP’s Privacy Policy.

Cookies (and other similar technologies, such as pixel tags, web beacons, and clear GIFs) are a small piece of information saved in your browser storage. They help us to recognize you as a visitor having previously visited the Website, to save your browsing history and to customize the content accordingly. Cookies also help to ensure a smooth operation of the Website, to monitor the duration and frequency of visits to the Website and to collect statistics on the number of visitors to the Website. By analysing such data we can improve our Website experience and make our Websites more user-friendly.

The Company uses following cookies:

Cookie	Description
PHPSESSID	The PHPSESSID cookie is native to PHP and enables websites to store serialised state data. On the Action website it is used to establish a user session and to pass state data via a temporary cookie, which is commonly referred to as a session cookie.

Cookies for third parties

When you visit a page on our Website with content embedded from third parties, for example, Google Analytics, HubSpot or Bizo, cookies may be downloaded onto your device. We do not set or control these cookies and they can change at any time without PAYAPP's knowledge. If you are concerned about the types of cookies that may be downloaded you can check the third party websites for more information about these cookies. Below are the known cookie names for third party services:

Cookie	Description
DSID	By Google - We use other cookies with names such as DSID, FLC, AID, TAID, and exchange_uid. Other Google properties, like YouTube, may also use these cookies to show you more relevant ads.
IDE	By Google - We also use one or more cookies for advertising we serve across the web. One of the main advertising cookies on non-Google sites is named 'IDE' and is stored in browsers under the domain doubleclick.net.
NID	The NID cookie contains a unique ID Google uses to remember your preferences and other information, such as your preferred language (e.g. English), how many search results you wish to have shown per page (e.g. 10 or 20), and whether or not you wish to have Google's SafeSearch filter turned on.
__cfduid	Cloudflare cfduid cookie - used to identify individual clients behind a shared IP address and apply security settings on a per-client basis. For example, if the visitor is in a coffee shop where there are a bunch of infected machines, but the specific visitor's machine is

	trusted (e.g. because they've completed a challenge within your Challenge Passage period), the cookie allows us to identify that client and not challenge them again. It does not correspond to any user ID in your web application, and does store any personally identifiable information.
__utma	Google Analytics - This cookie is what's called a "persistent" cookie, as in, it never expires (technically, it does expire...in the year 2038...but for the sake of explanation, let's pretend that it never expires, ever). This cookie keeps track of the number of times a visitor has been to the site pertaining to the cookie, when their first visit was, and when their last visit occurred. Google Analytics uses the information from this cookie to calculate things like Days and Visits to purchase.
__utmc	Google Analytics - The B (__utmb) and C cookies are brothers, working together to calculate how long a visit takes. __utmb takes a timestamp of the exact moment in time when a visitor enters a site, while __utmc takes a timestamp of the exact moment in time when a visitor leaves a site. __utmb expires at the end of the session. __utmc waits 30 minutes, and then it expires. You see, utmc has no way of knowing when a user closes their browser or leaves a website, so it waits 30 minutes for another pageview to happen, and if it doesn't, it expires.
__utmz	Google Analytics - Mr. __utmz keeps track of where the visitor came from, what search engine you used, what link you clicked on, what keyword you used, and where they were in the world when you accessed a website. It expires in 15,768,000 seconds – or, in 6 months. This cookie is how Google Analytics knows to whom and to what source / medium / keyword to assign the credit for a Goal Conversion or an Ecommerce Transaction. __utmz also lets you edit its length with a simple customization to the Google Analytics Tracking code.
_bizo_bzid	Bizo - Tracking for Bizo's business demographics data.
_bizo_cksm	Bizo - Tracking for Bizo's business demographics data.
_bizo_np_stats	Bizo - Tracking for Bizo's business demographics data.
anj	The anj cookie contains data denoting whether a cookie ID is synced with our partners. ID syncing enables our partners to use their data from outside the Platform on the Platform
icu	The icu cookie is used to select ads and limit the number of times a user sees a particular ad. It contains information such as the number of times an ad has been shown, how recently an ad has been shown, or how many total ads have been shown.
sess	The sess cookie contains a single non-unique value: "1". It is used by the Platform to test whether a browser is configured to accept cookies
uuid2	This cookie contains a unique randomly - generated value that enables the Platform to distinguish browsers and devices.

When you use a browser to access our content, you can configure your browser to accept all cookies, to reject all cookies, or to notify you when a cookie has been downloaded.

Each browser is different, so if you do not know how to change your cookies preferences, check out its Help menu. The operating system of your device may have additional cookies controls. If you do

not want information to be collected using cookies, use a simple procedure offered in most browsers that allows you to opt out of cookies. To learn more about managing cookies, visit <http://www.allaboutcookies.org/manage-cookies/>.

However, please note that in some cases deleting cookies may slow down your browsing speed, limit some Website features or block access to the Website.
